

Nordoxepin

General:

Nordoxepin is a tricyclic antidepressant drug with sedating and anxiolytic properties. It is an active metabolite of Doxepin. Optimal sedation occurs at serum concentrations between 100-250 µg/l. Like other tricyclic antidepressants, its toxicity is expressed as cardiac dysrhythmias, which occur at concentrations > 500 µg/l.

Material: 2 ml serum

TAT: 5-7 days*

Method: LCMS

Units: µg/l

Ref.- range: 50 - 250
