

# Tiagabine

Tiagabine is an anti-convulsive medication and is also used in the treatment of panic disorder as are a few other anticonvulsants. It is believed that the pharmacology is related to its ability to enhance the activity of gamma aminobutyric acid (GABA), the major inhibitory neurotransmitter in the central nervous system.

Material: 1 ml serum

TAT: 5-7 days\*

Method: LCMS

Units: µg/l

Ref.- range: 20 - 200
